PAST

“Production” was the only concern

In the past the onus on production and marketing preceded every other concern. Although, it ushered profitable regimes for the organisations, the essentially crucial factor quality more often than not was missing from their scheme of things. The very factor which was to define their success in the imminent future.

PRESENT

“Quality” - The inevitability

Realising the need for quality to gain the leading edge and stay ahead of competition, every organisation is striving to meet quality standards. Stringent quality control, assurance and checking practices became an integral part of production processes.

FUTURE

“Digitalization” The smart way forward!

With the rapid advancement in technology, organisations are endowed with opportunities to leverage electronic Quality Management Systems to maintain consistency in quality, minimise human interference, inspire efficiency, keep abreast of market developments and achieve higher levels of productivity at one go. In all certainty, it is the smart way forward!

Changing paradigms of Life Science Industry

IT'S TIME FOR TECHNOLOGY TO TAKE OVER!

Today, Life Sciences Industries that operate as a part of global production & supply chain are bound to comply with globally acclaimed quality standards to sustain their competitive edge. With it comes the pressure of recurrent audits that assay the consistency of compliance to the set standard operating procedures. Failing which, can impact the marketability of the final product.

For organizations, operating under such inflexible regimes can be arduous besides complete dependence on human skills can prove to be counter productive. In such scenario, organizations are left with little choice but to keep trend with technological advancements.

With Motto Systems' GMPPro- (A Global Enterprise Quality & Compliance Management System) offering through-the-line solutions to holistically address the challenges across the Production chain, Life Sciences Industry gets the boost it deserves.

Adherence to quality standards across the verticals of procurement, manufacturing, packaging, handling, storage and distribution that complete the production cycle is a decisive factor in ensuring quality outcome. And in today's highly competitive environment organizations need effective Quality Management Systems that not only fuel efficiency at each level but also affect harmony between these disparate functions to realize optimized performance & profitability.

GMPPro from Motto Systems is a world class quality & compliance management system specifically tailored to meet the needs of Life Sciences Industry. With a host of inherent advantages associated with it, GMPPro is enabling Pharma organizations of all sizes to streamline their quality processes, eliminate redundant systems and reduce human intervention to discover attain new levels of excellence.

GMPPRO ADVANTAGES

- » Robust & Scalable Procedures
- » Consistent Performance
- » Easy to Access & Easy to Adopt
- » Control over Non-Conformances
- » Timely updates & Version controls
- » Better Visibility on Workloads
- » Efficient Work Planning & Management
- » Streamlined Work Approach

PHARMACEUTICALS
NUTRACEUTICALS
BULK DRUG

BIOTECHNOLOGY

GMPPRO & HOW IT HELPS?

- » Adds value to the organization in terms of quality compliance by making every user to follow SOPs.
 - » Self-guiding procedures that help employees to follow good documentation practices every time.
 - » Backed by GMPPro software that eliminates tedious manual documentation while making it error free.
 - » Designed to be user-friendly and easy to understand where minimum functional knowledge of production processes is sufficient for employees to handle GMPPro.
 - » Real time visibility in operations keeps management in the know on actual statuses.
 - » Diverse utility; with GMPPro finding applicability across the spheres of Material management, Manufacturing, Quality Control, Quality Assurance and Engineering requirements.
 - » Most cost-effective solution in its class that goes on to be a profitable investment in the long run.
- And many more...*

GMP Pro[®]

Insightful and all-embracing

Backed by a thorough understanding of each functional area of the production spectrum GMPPro by Motto Systems is a smartly devised solution where the robust independent modules of each domain like warehouse, production, quality control, quality assurance and engineering can be seamlessly integrated to meet more than one requirement upon demand.

WAREHOUSE

- » Material Plan
- » Purchase Enquiry
- » Purchase Requisition
- » Purchase Order
- » Material Receipts
- » Mixed / Tanker Solvents
- » Job Work Process
- » Inter unit Transfers
- » Material Inventory
- » Material Gatepass
- » Material Request & Release
- » Marketing Indents
- » Sales Orders
- » Dispatch Advice
- » Product Dispatch
- » Supplier Management
- » Customer History

QUALITY CONTROL

- » Specifications
- » Sample Inward
- » Sample Analysis
- » Raw Data Management
- » Reserve Samples
- » In-house Working Standards
- » Reference Standards
- » Volumetric Solutions
- » Lab Chemicals
- » Out Of Specifications (OOS)
- » OOS Manufacturing Investigation
- » Out Of Trends (OOT)
- » Stability Protocols & Process
- » Certificate Of Analysis (COA)
- » Re-test Analysis
- » Instrument Calibration & Reports
- » Third Party Testing Samples
- » Samples Destruction

PRODUCTION

- » Production Plan
- » Bill of Materials
- » Batch Indents
- » Batch Line Clearance
- » Equipment Line Clearance
- » Batch Process Records
- » BPR Request & Issue
- » Batch Execution
- » Recovery & Reprocess
- » Material Transfers
- » Commercial Packing
- » Dispatch Advice
- » Equipment Logs

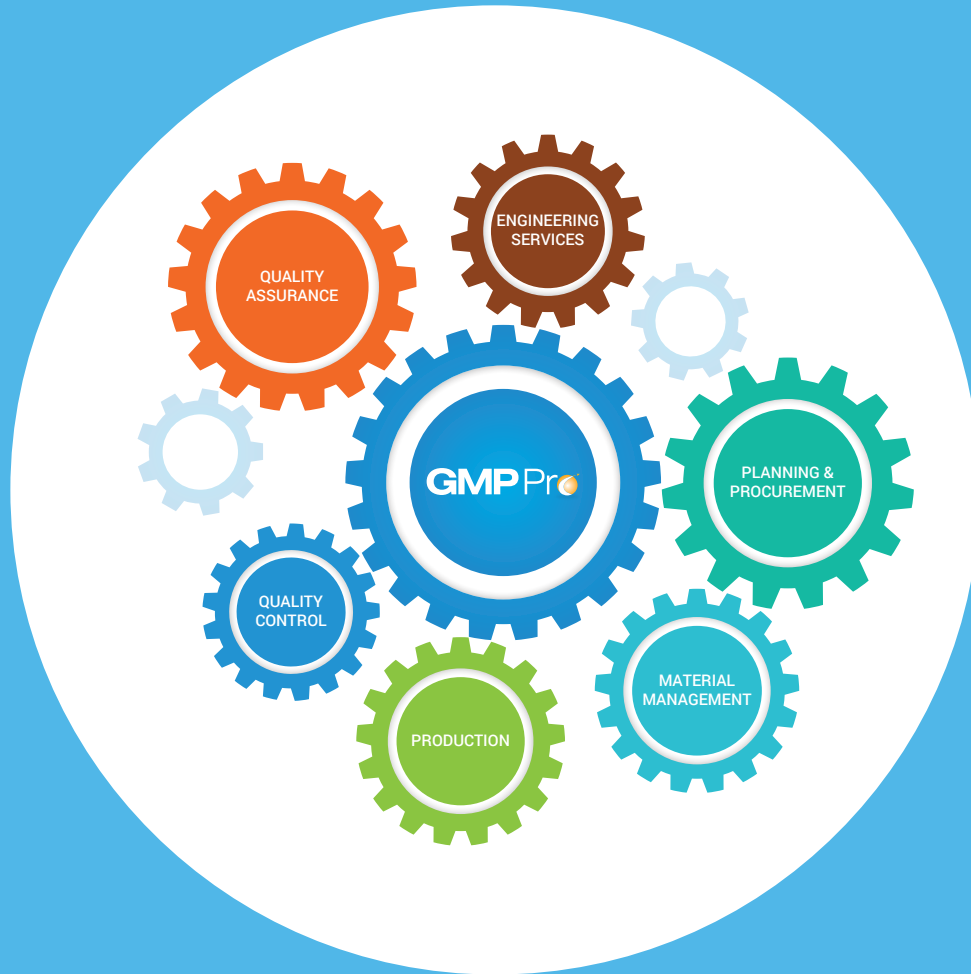

QUALITY ASSURANCE

- » QA Release
- » Change Control
- » Deviations & Investigation
- » Incidents
- » Document Control
- » Supplier Qualification
- » Complaints
- » Product Returns
- » Product Recall
- » CAPA Management
- » Quality Review
- » Yield Review
- » Electronic Document Management

ENGINEERING

- » Equipments
- » Instruments
- » Calibrations
- » Preventive Maintenance
- » General Maintenance
- » Service Request
- » Breakdown Maintenance
- » Equipment Occupancy
- » Work Permits
- » IQ, OQ & PQ Documents

GMP Pro[®] SOLUTIONS

Specific needs. Specific Solutions!

GMPPro Solutions are designed to offer flexibility of choice to the clients. An independent module to meet a specific requirement or the full scale application to address issues comprehensively, GMPPro Solutions caters to clients' needs with judiciously crafted solutions.

With seamless integration of processes across production chain, our clients can expect enhanced performance in terms of quality and productivity.

GMPPro – 360

The one stop solution!

GMPPro – 360 is a full scale enterprise solution to cater the needs of complete process life cycle management right from Procurement, Process, Quality and Delivery.

GMPPro – QMS

Prioritizing quality!

GMPPro – QMS is an Enterprise Quality Management system (EQMS) designed to take care of complete Quality needs of a company with Quality Control (LIMS) and Quality Assurance modules.

GMPPro – Modular

Built-to-suit to your requirements

With GMPPro – Modular, clients can enjoy the advantages of GMPPro by getting customized solutions with full functional scope to meet specific requirements of the organization.

WHY CHOOSE GMPPRO?

GMPPro inspires enhanced Quality practices from the ground up. Designed with a deeper understanding of processes, GMPPro greatly aids the users in adhering to the standards while the uniquely configured built-in cGMP functions facilitate effective control over operational limitations, deviations and non-conformities. The advantages in a nutshell include:

Industry Best Practices:

Motto Systems' prides on a perceptive approach to its work that realizes error free, stringent and easy to implement Quality Management Systems every time. The team of qualified subject matter experts at Motto Systems' interacts with personnel of relevant departments before setting out to design systems that augment best practices at all levels.

Controlled Environment:

GMPPro ushers stringent compliance regimes where deviations from Standard Operating Procedures become almost extinct. It lends control over document distribution and access, enables supplier control through effective evaluation and effectively reigns in rejections and non-conformities to catalyze overall profitability of the organization.

Connected Processes:

Motto Systems' appreciates the need for effective coordination and communication at Inter and Intra department levels for realizing overall efficiency. GMPPro achieves this by bringing various functions on to one integrated platform while eliminating silos between departments and the ensuing data duplication for improved data integrity.

Improved Compliance:

GMPPro works intelligently for data delegations and validations. By reducing manual dependencies it improves ease of data administration during investigations, review, analysis & trending of data.

Cost Reduction:

GMPPro saves great in terms of both money and time. Not only it disposes off with the onerous manual entries but also acts as your ready reckoner during data verification & reporting in addition to facilitating timely delivery to customers. Not to mention the cost of production reruns in case of non-compliance to procedures.

THE QUALITY ADVANTAGE ON YOUR SIDE!

Motto Systems emphasizes on providing futuristic solutions that inspire quality at every level of the production cycle.

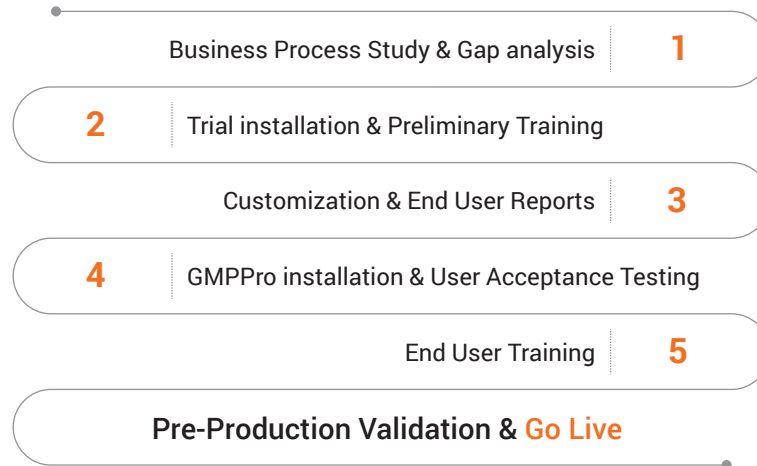

Our capabilities
Your competency

CORE CAPABILITIES

- » 21 CFR Part 11 compliance for Electronic Records & Signatures.
- » 21 CFR Part 210 & 211 compliance for cGMP Practices.
- » Customizable workflows as per company SOPs.
- » Built-in cGMPs to achieve compliance at every level.
- » Automated Notifications via dashboard widgets and emails.
- » Auto escalation of tasks, reports and complaints.
- » Integrated change management throughout process cycle.
- » Self-driven navigation and user friendly screens.
- » Secure and role based access to each module.
- » Drill-down data architecture for effective investigations.
- » Harmonized best practices and guides users to follow as per SOPs.
- » Advanced search options and retrieval of intended data.
- » Complete control on rejected & expired materials for usage.
- » Version controls and access controls over obsolete documents.
- » Complete data security & automated data backup.
- » Complete Audit Trail.

GMPPro IMPLEMENTATION PLAN

During the course of implementation and support, we found Motto Systems is committed and delivered best quality. We are happy to recommend M/s. Motto Systems Pvt Ltd., for any one whom so ever interested in implementing GMPPro for their business.

About Motto Systems

Motto Systems' is an organization that has made pioneering strides in providing top-class Enterprise Quality Management Solutions (EQMS) to Life Sciences' companies. Driven by innovation and backed by a qualified team of GMP domain and IT experts, Motto Systems' is enabling organizations to overwhelm their pressure to remain competitive while meeting quality standards, through its range of innovative products. In addition, Motto Systems' is inspiring companies to seamlessly achieve global regulatory and company-specific requirements with its revolutionary compliance management solutions.
